SIR:

Supplemental to the response filed in the above-identified application on May 20, 2003, please reconsider the application in view of the following amendment and remarks.

**IN THE CLAIMS**

Please amend the Claims as follows.

1. (Twice Amended) A blow-molding method for fiber-containing thermoplastic resins, comprising:

holding a parison comprising an inorganic fiber-containing, melt-expandable thermoplastic resin, between a pair of facing splits of a mold;

blowing said parison to shape it; and

thereafter reducing a gaseous pressure inside said parison, to thereby again expand said inorganic fiber-containing, melt-expandable thermoplastic resin, to obtain a blow-molding.
